Change in Governance Application Request for R.D. 900

Environmental Questionnaire – Expanded Responses

- 1) The entirety of RD 900 lies within the urbanized, incorporated boundary of the City of West Sacramento. Existing land uses in the District cover a wide spectrum from small single-family residences to industrial complexes and the inland Port of West Sacramento. The northern area between the UPRR mainline and the Barge Canal/Deep Water Ship Channel includes the Port Industrial Park, the central business district, Raley Field, City Hall; commercial and office uses; and existing and developing residential neighborhoods such as the Bridge District. The area south of the Barge Canal/Deep Water Ship Channel includes the existing and developing Southport Industrial Park, residential areas and associated commercial uses; and several Washington Unified School District schools including River City High School. Portions of Southport remain rural-residential as is intended by the General Plan.

The District topography is generally level with the exception of the levees on the west, south and east boundaries, and the UPRR mainline ballast embankment on the north. This District is within the Great Valley geomorphic province which is a nearly level alluvial plain and has been shaped by fluvial processes. It is underlain by two alluvial units, both of which are Holocene age. Directly adjacent and generally parallel to the Sacramento River is a band of alluvium made up of sand, gravel, and silt (Qha). Westerly from this unit is a widespread basin deposit (Qhb) made up of fine-grained sediments with horizontal stratification. The District vegetation comprises native grasses, trees, some fresh emergent wetlands, and improved urban landscapes. Wildlife in the District generally consist of migratory birds including the Swainson's Hawk, rodents, skunks, possums, fish within the Deep Water Ship Channel and interior lakes/basins, coyotes, turkeys, gopher snakes and river otters.

- 2) The areas surrounding the District include the Sacramento River on the east, the Sacramento Regional Sanitation District Pump Station and agriculture on the south beyond Shangri-La Slough, the Yolo Bypass flood control area with seasonal agriculture to the west of the Deep Water Ship Channel, and the remaining urbanized area of the City of West Sacramento to the north of the UPRR mainline. The topography, soils, and vegetation are largely the same as within the District. The wildlife in the surrounding areas expands to include several fish species including the Chinook Salmon and Delta Smelt.
